„Distribution“  
78,74 x 78,74 x 39,37 Inches  
2011

## photography/photo-kinetic objects

In our joint projects we develop photo-kinetic objects also known as mobile.

Central themes of our work are human being, the instability and fragility of life, living space or our social structure and their changes. These topics are told in the way of moving images as three dimensional objects about people which are located at different levels in their own cosmos. The levitation is shown in the type of presentation, to float images and objects in space via mobile. The imagination of the viewer will be brought to float together through the form of presentation and the image content. By rotating and moving the characters with this kinetic object into new positions, the stories of the protagonists are always changing and retold in a different way.

### Aluminum cubes

For the hanging and presentation of the photo-kinetic objects in the room there are aluminum cubes made of aluminum profiles 0,98 x 0,98 inch in various sizes available, which are suitable to the respective homes and can be adjusted to the existing ceiling height.

Cubes for HuMiniature-objects are 33,46 inch high, floor space: 14,96 x 14,96 inch.

Levitation - „A Dream Within A Dream“  
78,74 x 39,37 x 39,37 Inches (2011)

Levitation  
„Disentanglement“  
78,74 x 57,09 x 35,43 Inches  
2012

The photo-kinetic objects are designed according to their mode of effect and their available space in three different sizes:

- Miniature - Radius of rotation to 19,69 inch
- small - Radius of rotation to 39,37 inch
- medium - Radius of rotation to 59,06 inch
- big - Radius of rotation to 78,74 inch

Furthermore, we also offer unique company portraits for representation and family-portraits in motion. If interested, visit our website [www.hum-art.com](http://www.hum-art.com) to see our commissioned art.

Levitation  
„Dependence“  
70,87 x 78,74 x 35,43 Inches  
2011

### Technical details:

Solventprint laminated to Aluminum-Dibond; different front and back;

twisted plastic rope, industrial velcro, aluminum tube, vortex rope, O-rings, s-hooks, collars;

## curriculum vitae

Hermine Sardelic 1961 born in Andorf; study at the Pedagogical University of Linz  
 Michael Sardelic 1959 born in Vienna; study at the Pedagogical University of Innsbruck

Work together under the stage name HuM-ART in joint projects in Ried im Innkreis and Andorf (Upper Austria)  
 Acquisitions by the Federal Ministry of Education, Art and Culture and the Province of Upper Austria  
 Artist members of Kinetica-Museum, London, and Professional Association of Visual Artists Upper Austria (BVOÖ)
